

Mega Min

Extra Phosphorus

High Phosphorus and Calcium Mineral Supplement to Assist Growth, Fertility and Lactation

MegaMin Extra Phosphorus provides natural broad spectrum macro and trace minerals, plus additional phosphorus, calcium, and magnesium. Phosphorus is essential for energy metabolism, appetite, efficiency of feed utilisation, bone growth, lactation and fertility. Suitable as a year-round supplement for breeders, weaners, maiden heifers and ewes, MegaMin Extra Phosphorus is also beneficial for stock grazing phosphorus-deficient country.

Supplementing with phosphorus during times when pasture quality and quantity is high can be most beneficial as livestock will respond best to phosphorus supplementation when their energy and protein requirements are being met.

- ▶ Beneficial for breeders, weaners, maiden heifers and ewes.
- ▶ Ideal for stock grazing phosphorus-deficient country.
- ▶ Phosphorus can assist growth, milk production and fertility.
- ▶ Phosphorus is vital for energy production (dry and green feed).

Feeding Guide

Recommended daily intake is 10-20g/100kg body weight/day.

	FEED RATE (g/day)
Cattle	50-100
Sheep/Goats	5-10
Horses	50-100

Initial consumption rates may be higher due to salt or mineral cravings. For more information contact AgSolutions Australia.

Note: Livestock will crave and seek out phosphorus if deficient. Salt can interfere with consumption and may be altered to slow or increase supplement intake. In phosphorus-deficient areas where bone chewing may occur (either during lactation or where significant signs of lameness are observed) a higher intake of phosphorus supplements (up to 150g/day for cattle) may be beneficial.

Suitable For

Year-round supplementation for cattle, sheep/goats	✓
Breeders, weaners, maiden heifers and ewes	✓
Green/wet season or phosphorus-deficient country	✓

TYPICAL ANALYSIS (DMB)	Extra Phosphorus
Calcium (Ca)	15.0%
Phosphorus (P)	4.0%
