

Mega Min

Equine Enhancer

Specially formulated by a leading Australian Equine Nutritionist to meet the needs of horses with access to diets consisting largely of pasture or hay. MegaMin Equine Enhancer is suitable for horses and ponies in all disciplines.

Feeding Guide

Directions: Mix well into feed and dampen. Ensure that an adequate supply of fresh, clean drinking water and free choice plain salt are available at all times. Introduce into your horse's diet slowly over 7 to 10 days.

Dosage/Administration: 1 level scoop = approx 50g of Equine Enhancer

Average Feeding Rate:

Horse 100g per day
Pony 50g per day

	Bodyweight (kg)		
	400	500	600
Not in work	45	55	65
Light work	60	70	80
Moderate work	80	100	120
Pregnant Mares (first 8 months)	60	70	80
Pregnant Mares (last 3 months)	80	100	120
Lactating Mares	60	80	100
Aged Horses	60	70	80

	Expected mature weight (kg)		
	400	500	600
Weanlings, Yearlings and 2YOs	80	100	120

Feeding rates above are in g/day.

Presentation

2.8kg Pouch Provides: 28 daily average horse* doses
10kg Bucket Provides: 100 daily average horse* doses
20kg Bucket Provides: 200 daily average horse* doses
*Based on 450-500kg horse

NatraMin for Horse Pastures

Greater emphasis on pasture feeding of horses should be made in Australia, as it offers the advantage of considerable reduction in overall feeding costs in combination with a return to the natural grazing conditions to which horses are well adapted.

There are challenges to achieving healthy pastures for horses such as soil erosion, compaction and severe soil mineral imbalances. The performance of your pastures and grazing horses depends on the condition of your soil.

NatraMin products are now recognised as a core part of the solution. Our range of Mineral Fertilisers and Soil Conditioners are designed to assist soil regeneration by addressing the nutritional, biological and structural aspects of soil fertility. A major advantage of using NatraMin products for horse pastures is that they are made from Natural Rock Minerals that have no withholding period so paddocks can be grazed immediately after spreading.

When integrated with soil management strategies, NatraMin can assist to produce living, healthy and balanced soil capable of producing high yielding crops, pastures and livestock.

Unlock the potential in your soil with Natural Bio-Activated Minerals

Natra Min

Rod Jenner, Farming and Operations Manager of the renowned Glenlogan thoroughbred nursery at Innisplains, has seen the difference in soil structure and pasture nutrition since using NatraMin in their fertiliser program.

Prior to using NatraMin, their heavy black soils were becoming harder and pasture growth was below expectations.

Rod explains, "Rough ground affects bone development and we certainly don't want the high risk of leg injury for young thoroughbreds with their racing life ahead of them.

We have to be results driven in every part of our farming, pasture nutrition and breeding at Glenlogan and we have got more out of NatraMin than what we expected. The soil structure continues to improve and the pastures are the best they've ever been."

"NatraMin is safe as a fertiliser and because it has softened our soil, it is safer on our horses' feet and legs because we no longer have to try to cultivate or rip paddocks."

The AgSolutions Difference

A company dedicated to 'Helping Australia Grow'

AgSolutions has over 27 years' experience in soil and livestock nutrition and it is this understanding of soil and pasture nutrition that provides our family company with a point of difference for understanding your equine nutritional requirements. We understand soil nutrition and the essential links between nutrition, structure and biology that ultimately influences nutrient uptake into your pasture or forages being grazed.

AgSolutions develops and manufactures mineral fertilisers and soil conditioners (NatraMin) for all aspects of farming with dominance in pasture and forage programs. This is backed by the provision of a soil testing service and agronomic advice for fertiliser and soil improvement programs that consider all aspects of your property such as; minerals, grazing management, aeration, legumes and soil compaction.

To ensure the best possible weight gains for your livestock, AgSolutions can assist you with a supplementation program and provides a ration formulation service for backgrounding stock or feedlot rations. We are now offering a pasture/hay testing service to support equine supplementation.

The importance of broad spectrum minerals and trace elements on animal nutrition led us to develop and expand our MegaMin Livestock Supplements to include an equine range. Both our NatraMin soil products and MegaMin Livestock and Equine supplements are all primarily based on natural earth and sea minerals, because we are passionate about helping: soil, pasture, livestock, horses and ultimately helping people.

Premium Triple Action Vitamin and Mineral Supplement for all Types of Horses

Mega Min

Equine Enhancer

FEATURES

- ▶ Scientifically balanced vitamins and minerals
- ▶ Fortified with biotin, organic zinc and methionine to assist skin and coat condition and promote healthy hoof growth
- ▶ Postbiotic to help support a healthy hindgut and efficient digestion
- ▶ Contains AgSolutions' unique blend of natural minerals to provide a broad range of additional nutrients including silicon, boron and chromium
- ▶ To help keep your horse healthy on the inside and brilliantly shiny on the outside

Premium Triple Action Vitamin and Mineral Supplement Suitable for all Types of Horses

MegaMin Equine Enhancer is designed to promote overall health while also actively supporting hoof quality, coat condition and gut function.

Features and Benefits

Healthy Hooves - No hoof, no horse! MegaMin Equine Enhancer contains organic zinc, methionine and a targeted 20mg of biotin per 100g dose to help keep your horse's hooves growing strong and healthy. No need to use a separate hoof supplement!

Strong Immune System - A well balanced diet is essential to maintain effective immune function. MegaMin Equine Enhancer provides trace minerals and vitamins that are generally not at adequate levels in pasture and hay to support a strong immune system.

Shiny Coat - Good health on the inside is reflected in the way a horse's coat looks on the outside. MegaMin Equine Enhancer contains minerals, trace minerals, vitamins and amino acids that a horse needs to stay healthy on the inside and brilliantly shiny on the outside.

Efficient Digestion - MegaMin Equine Enhancer incorporates a postbiotic to help support a healthy hindgut and aid efficient fibre digestion.

Antioxidants - MegaMin Equine Enhancer includes two potent antioxidants in selenium and vitamin E. These antioxidants work together in your horse's body to help reduce the muscle damage that can occur during exercise.

Natural Minerals - MegaMin Equine supplements contain AgSolutions' unique blend of natural broad spectrum minerals that include a host of trace minerals such as chromium, boron and silicon that are absent from many other supplements.

Why Natural Minerals?

MegaMin Equine Enhancer contains AgSolutions' unique blend of naturally occurring earth and sea minerals derived from carefully selected ingredients to provide an exceptional array of broad spectrum macro and micro minerals.

Owners of animals using the minerals in MegaMin supplements have reported higher tolerance to stress, sustained energy levels, a robust immune system, improved performance and faster recovery from illness.

Does my horse really need a mineral supplement?

Minerals play important roles in physiological, structural and regulatory functions within the horse's body and without a correct balance of minerals, including trace minerals, horses are unable to perform to the best of their genetic potential.

Australian soils, and consequently the pastures, hay and grain we feed our horses, tend to be deficient in a number of minerals. Pastures usually lack adequate quantities of copper, zinc, selenium and iodine and have variable amounts of calcium, phosphorus, sodium and chloride. Horses on pasture and hay based diets will usually require a supplement to replace shortfalls of essential minerals. Ensure horses ALWAYS have ad lib access to fresh drinking water and plain, free choice salt.

Complimentary Diet Analysis

As part of our commitment to 'Helping Australia Grow', and to assist you to ensure your horse is receiving a balanced diet, we offer MegaMin Equine Supplement customers a free feed review, analysis and discussion to help fine-tune your horse's requirements.

Shiny coats, strong hooves and a healthy hindgut are made of these!

MegaMin Equine Enhancer is fortified with ingredients to help promote optimal hoof, skin and coat condition from the inside out.

Biotin supplementation of 20mg per day has been linked to improvements in hoof structure and strength.

Zinc is essential for the immune system as well as bone, cartilage, hoof formation and the integrity of skin. Organic chelated zinc is more absorbable and efficient.

Methionine is important for optimum growth, nitrogen balance and in stimulating the production of Keratin.

Postbiotics support digestive health by balancing gut microbial populations. Optimal digestive function supports higher, more consistent performance.

Antioxidants such as selenium and vitamin E work in synergy to help prevent polyunsaturated fatty acid oxidation that can damage muscle and cell membranes.

Naturally Occurring Extras!

Silicon is incorporated into joint cartilage and is essential for bone formation and collagen synthesis.

Chromium is concerned with the control of blood glucose and has been reported to have a role in supporting increased energy metabolism, and assisting to reduce stress and lactic acid accumulation during fast exercise.

Boron is believed to be necessary for the synthesis of calcium and magnesium and is also thought to play a role in normal brain function.

What horse owners have experienced

Strong, Healthy Hooves

"I'm a big fan of MegaMin Equine Supplements!

With the Equine Enhancer I have seen significant results in coat quality and hoof quality. Sometimes I have horses come into my stables that are quite poor in condition and I find it really interesting in watching them over time progress and improve. AgSolutions has given me confidence that I'm providing my horses with what they need nutritionally to perform to the best of their ability."

Emma Flavelle,
Emma Flavelle Dressage

Jane Anderson

"I've Seen The Difference!"

Brett Cantle, Equestrian Australia instructor, eventing medalist, and stud manager of Arden Connemaras and Performance Horses has seen the benefits since supplementing his horses with MegaMin.

"Optimal performance begins with optimal health. This is why Equine Enhancer has become an essential part of my feeding program. I have seen the improvement it has caused in my horse's hooves, hair and general health. I feed Equine Enhancer because if I want my horses to be at the top of their game, I need them physically fit and mentally strong."

Brett Cantle, Gympie QLD

Feeding For Success

From Australia to the United States, Professional Horseman Rob Leach has successfully trained and shown horses in the reined cow horse, cutting, campdraft and stockman's challenge events at an elite level.

Rob's particular focus is on the young horse in building a foundation for success, giving them the best opportunity to excel in any arena.

"We use MegaMin Equine Enhancer in our horse's feed, it shines them up and makes them feel good. We are really happy with how it just helps them do better and convert their feed better. We have had a lot of good results from using MegaMin Equine Enhancer and highly recommend the product."

Rob Leach, Rob Leach Equine/Select Sires

Amazing Turnaround Using MegaMin Equine Enhancer

"I have always believed in feeding minerals to my horses but was amazed at the difference that Equine Enhancer had on the coat condition of my 2 year old quarter horse. Prior to feeding Equine Enhancer, Buggy was severely affected with insect bites and bite reactions - he was rubbing his tail, mane and head excessively."

"The only thing I changed was the addition of 100g per day of MegaMin Equine Enhancer into the diet and in six weeks Buggy looked like a different horse. Now his coat has settled and he looks 150% better, making him a happier and calmer horse!"

Steve Thake, Woolooga

BEFORE - Buggy prior to supplementation with MegaMin Equine Enhancer

AFTER - Buggy after 6 weeks of supplementation with MegaMin Equine Enhancer
